PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience building backend applications using Java, Spring Boot, Node.js, and Express.js. Skilled in REST API development, authentication and authorization, SQL and NoSQL database design, unit testing, debugging, and Git/GitHub. Seeking an entry-level Software Engineer role to apply strong programming, backend development, and problem-solving skills in a collaborative software development environment.

TECHNICAL SKILLS

Programming Languages: Java, SQL, JavaScript, TypeScript

Backend Technologies: Spring Boot, Spring Security, Spring Data JPA, Hibernate, Node.js, Express.js, REST APIs, JDBC, JWT

Databases: MySQL, MongoDB, PostgreSQL, MS SQL Server

Frontend Technologies: React.js, HTML, CSS, JavaScript, jQuery, Tailwind CSS, Bootstrap

Testing: JUnit, Mockito, Unit Testing, Postman

Cloud and DevOps: AWS EC2, AWS S3, Docker, Git, GitHub

Tools: Maven, IntelliJ IDEA, Visual Studio Code

Computer Science: Object-Oriented Programming, Data Structures and Algorithms, Collections, Multithreading, Exception Handling

PROJECTS

JWT-Based Authentication and Account Security System

GitHub

Spring Boot, Spring Security, Spring Data JPA, MySQL, JWT, JUnit, Mockito, Maven, Git

- Developed an authentication microservice supporting user registration, login, and secure session management using Spring Security and JWT.
- Implemented refresh token rotation, email verification, password recovery, and account lockout after repeated failed authentication attempts.
- Built token-based forgot-password and reset-password workflows to secure account recovery.
- Wrote unit tests using JUnit and Mockito for authentication and token-handling logic.
- Implemented global exception handling to return meaningful responses for invalid or expired tokens.

E-Commerce MERN Stack Application

GitHub

Node.js, Express.js, MongoDB, Mongoose, React.js, npm, Git

- Developed a modular e-commerce application using Node.js and Express.js with Routes, Controllers, Services, and Models for maintainable backend architecture.
- Built REST APIs for product, category, shopping cart, order, order-item, and address management following REST architectural principles.
- Designed MongoDB schemas using Mongoose for users, products, carts, orders, and addresses with validation and efficient database operations.
- Developed React.js interfaces for product browsing, cart management, order placement, and address management.
- Implemented centralized error handling and request validation, and tested REST API endpoints using Postman.

Bus Reservation System

GitHub

Java, JDBC, MySQL, Layered Architecture

- Built a console-based bus reservation system using Java, JDBC, and MySQL for persistent data storage.
- Designed DAO, Service, and Model layers to separate data access, business logic, and presentation.
- Implemented user, bus, and booking modules with seat allocation and cancellation functionality.
- Applied input validation, structured exception handling, and PreparedStatements to prevent invalid bookings and SQL injection.

EDUCATION

B.E. in Computer Science and Engineering

May 2026

Hindusthan College of Engineering and Technology, Coimbatore

CGPA: 8.62 / 10

Higher Secondary Certificate (HSC)

May 2022

Rice City Matric Hr. Sec. School

82

Secondary School Leaving Certificate (SSLC)

May 2020

Rice City Matric Hr. Sec. School

83

CERTIFICATIONS AND ACHIEVEMENTS

- Java Foundation Certificate — Infosys SpringBoard
- Web Technologies Fundamentals — Infosys SpringBoard
- Solved 300+ problems on LeetCode
